Product Highlights

Nutrition plays a huge role at every age. As parents, it is crucial for us to provide our children with the appropriate nutrients along the way to nurture their bodies and fuel brain development. Furthermore, it is also important to provide your child with a solid immune foundation to assure them a brighter future. Since nutrition is vital for children to grow up to their full potential, the improved formula of NANKID OPTIPRO[®] 4 is specially made to meet your child's nutritional need.

Scientifically-formulated with a 100 million units* of probiotics** (*Bifidobacterium lactis* CNCM I-3446) and 2'-FL Oligosaccharide, NANKID OPTIPRO[®] 4 helps improve gut function by eliminating bad bacteria and feeding the good probiotics to support your little one's body defense system.

In addition, your little one continues to enjoy the benefits of DHA & ARA, and Optimized Protein developed using a unique process, that provides the right quantity and quality of protein. Give your little one a great start to lifelong wellness – give them the best start in life.

Available in 600g/1.3kg.

***Per 100g of milk powder.**
